

## INDUSTRY

# FLEET

Web Work for Fleet provides fleet maintenance departments with a custom tailored CMMS solution to meet their demanding and unique needs.

Web Work for Fleet has been developed with the specific tools required to effectively maintain fleets of any size. The regulatory requirements placed upon fleet managers are unique to the industry, and require a flexible, customizable software program as unique as the industry itself.

Web Work is a proven solution with the support and experience of engineers who have a tremendous amount of knowledge about the needs of this business sector.

Web Work for Fleet provides:

- » Unlimited maintenance & repair order functionality
- » Complete inventory & purchasing management
- » VMRS coding, core tracking and warranty monitoring
- » Fully web based across multiple platforms & languages
- » Government reporting modules and interfaces
- » Direct interface(s) to vehicle routing and fuel systems
- » User defined screens and reports

Web Work for Fleet is widely used throughout North America by fleet managers for a wide variety of vehicles, from cars to heavy duty multi-axle trucks. Thousands of users each day rely on Web Work to manage daily maintenance operations, control costs, and capital asset management.

Whether you are small, medium or large fleet spread around the globe, Web Work has the features, ease of use and ROI you need for today's demanding fleet maintenance operations.
